Leadership Team
Thank You
A LETTER FROM THE BOARD

It gives me great pleasure to inform you about how you have enabled Vibha to meet its goals for 2014. At the end of 2013, we launched a Year-End campaign to raise an additional $100,000 so that we could expand our model to seed, scale and grow new projects in new geographic locations across India. I am happy to report that thanks to your generous donations, we met our financial goal and selected 4 new projects that significantly impact the lives of underprivileged children in the geographies these projects serve. With the addition of these 4 projects to our existing portfolio, we have invested in a total of 32 projects in 2014. With our investments over the years, we have impacted the lives of over a million underprivileged children to-date.

At the beginning of 2014, we went through a rigorous process of identifying these new projects. After combing through numerous proposals, undertaking painstaking research and regular conference calls between the projects and the Vibha team, and making multiple project visits to ensure these projects meet Vibha standards, we identified 4 projects that we believe do justice to your investments.

While researching these new projects, we found additional projects that fit our seed, grow and scale model and also provided solutions to solve a systemic problem. Thus, this year we would like to double the stakes and raise $200,000 through our Year-End campaign. Raising this additional revenue will not only make Vibha a Million-Dollar organization, but it will also give us the additional resources and tools to expand our model and make the impact we want to. What can I say - we at Vibha are always seeking to expand our reach when it comes to solving the problems of underprivileged children.

We cannot do any of this without your continued support. We need patrons like you who believe in what we do and stay involved.

Please join the movement and make your annual donation to make a bigger difference in 2014 and beyond! Please make it online at vibha.org or send a check! Let us do more!

Leena Ghosh (Chief Operating Officer, Vibha)
The Vibha Philosophy

Vibha’s philosophy is that of a social venture catalyst. We seed, grow and scale grass-roots ideas that can solve systemic problems related to the underprivileged child through a cure that involves minimal external intervention with large scale societal impact. Such solutions are typically hard to find and involve closely working with all players related to the eco-system of the problem – the beneficiaries, beneficiary families, village, town and city councils, governmental agencies and above all society at large.

Vibha is not a funding agency. Vibha is a platform that brings together people that want to make a difference in the life of an underprivileged child (grass-root entrepreneur, donor, volunteer, govt. agencies and partner NFOs). Funding is one of the tools provided by this platform towards ensuring a scalable cure is found to SOLVE a systemic problem in the life of the underprivileged child. Vibha provides its social entrepreneurs with significant know-how, financial and management skills, Information Technology skills, marketing and fund-raising skills as well sustainability and scalability skills.

Vibha’s project screening process is a pain-staking detailed process so as to identify ideas that could possibly SOLVE once and for all a systemic problem related to the underprivileged child. Once selected, the social entrepreneur is provided with the necessary seed capital as well as know-how with constant project monitoring assistance through Vibha personnel and staff on the ground towards ensuring the project is meeting its necessary milestones towards achieving a scalable cure. If after a certain period of time (typically 3 years), the project has not achieved its goal of finding a scalable solution for the problem it’s trying to solve, Vibha starts a gradual exit process so as to ensure the project continues to benefit its beneficiaries with minimal disturbance.

If the project does achieve its goal of finding a scalable cure for the problem it is trying to solve, Vibha now plays the role of disseminating this cure far and wide through various channels including partner NGOs, other Vibha projects in different geographies, government agencies, and the involvement of society at large.

In short, we seed, grow and scale sustainable and scalable solutions for systemic problems affecting the lives of the underprivileged child.
VIBHA 2014 – Highlights

Amazon selects 3 Vibha projects for “Gift A Smile” Initiative

Amazon India has selected three of Vibha’s projects – Vidyarambam, Bhagvatula Charitable Trust and Sikshana - for Amazon’s CSR initiative “Gift A Smile”.

The Amazon “Gift A Smile” Foundation launched an initiative in which they handpicked 25 NGOs (Non-Governmental Organization) across India. We are very proud that three of these NGOs are Vibha’s partner projects. The 25 NGOs, impacting varying social causes, were asked to create a “Wish List” of items that they (the NGOs) needed. These items ranged from educational toys, books, sports equipment, clothes, hygiene products and many more. Amazon customers can now gift towards these wish lists and make a direct impact to these projects.

Vibha Project HEARDS wins grand prize of £2,000.00 from SAGE Publications

SAGE UK launched a Global Giving initiative to donate a total of £20,000 to various developmental and educational charities and projects in the developing world. Vibha India submitted 4 partner NGO projects for this initiative. Of the 21 projects chosen by SAGE, we are proud to inform you that one of our star projects, HEARDS, was selected for the grand prize of £2,000.

2014 has been a good year for HEARDS which aims to rehabilitate and eradicate child labor in Chittoor district of Andhra Pradesh. In 2014, eight students whose lives were changed by HEARDS, gave their 10th grade Board Examinations. Six of them passed with scores of above 80%. All these children were former child laborers who had worked in various factories making incense sticks, cigarettes or tires. The seeds that HEARDS has been sowing for so many years are starting to bear fruits.
Corporate Social Responsibility

India is the first country to adopt a Corporate Social Responsibility (CSR) legislation mandating companies with a net worth of Rs. 5 Billion or more to give 2% of their net profits of the last 3 years to social causes. This is a great boost for a Social Venture Catalyst like Vibha. Our goal is to educate, empower and enable every individual who wants to make a positive difference in the life of an underprivileged child; and legislation like this gives us the right tools to make it happen.

Since this legislation was passed, Vibha has been aggressively working with various corporations in India and presenting Vibha’s projects. Because Vibha’s projects have been thoroughly reviewed and are constantly mentored, supported and monitored by Vibha, the CSR wings of the corporations have been very receptive to our proposals. Thanks to the tireless efforts by Vibha’s team in India, results are materializing.

In 2014, six of our projects were picked by large corporations for funding at various levels. This increased the returns on Vibha’s investments, helped scale up successful models and reduced the dependency of the project on Vibha’s investment alone; thus enabling Vibha to identify, nurture and grow other successful models. Below are some of the CSR partnerships initiated by Vibha.

- Associate Cement Company (ACC) is adopting Sikshana’s Government School intervention in Wadi town, Karnataka state. Wadi is home to two cement plants of Associated Cement Company Limited.
- EMC Corporation is investing Rs. 800,000 to expand Sikshana’s Government School Intervention in Karnataka state.
- Volkart Foundation continues to invest in HEARDS and Sikshana’s projects and is increasing its investment to Rs. 1.5 Million this year.
- Cognizant Corporation’s outreach CSR team has visited our Sikshana schools in Maharashtra and Karnataka as they plan to expand their investments in these geographies. They have also visited our project Rachana in Maharashtra towards similar initiatives.
- IGate Corporation’s CSR team has visited project Rachana in Maharashtra to study its model and consider investing in it.
**A PROMISE FULFILLED - VIBHA EXPANDS ITS SOCIAL IMPACT WITH FOUR NEW PROJECTS IN THREE STATES**

In December 2013, Vibha organized a year-end fundraising campaign to raise $100,000, with the promise that the money will be used to expand existing projects and identify new projects to reach new communities. The supporters of Vibha rallied behind the campaign and we reached the target!

The projects team immediately identified two of Vibha’s current projects for expansion. They were Gramin Siksha Kendra (GSK) in Rajasthan, that has been doing innovative work in creating model schools (Uday pathshalas) by making community ownership a key factor; and Community Outreach Program (CORP, India), that has been doing exemplary work in the slums of Mumbai for the education of children.

The exciting challenge was to identify new projects in new geographies that fit into Vibha’s philosophy of seeding, growing and scaling models that are self-sustainable and replicable. Projects were scouted in U.P, Bihar, M.P, Haryana, Orissa and Gujarat. After extensive screening that involved pre-selection, site-visits and several rounds of reviews, the team identified the following four projects.

**EKALAVYA**

Eklavya is starting an education project for 895 children in 15 villages in Betul district of Madhya Pradesh. Eklavya will be implementing their two-pronged methodology that includes community level intervention, coupled with intervention at the Government school by involving teachers and functionaries of the state education department. The effectiveness of the project would be measured based on three broad parameters which are accessibility, quality of education and improvement in learning levels of children in the age group of 6-10.
SAMAVESH

Samavesh is similar to Eklavya, except that it is working in an urban setting in the city of Bhopal and will support 425 children in five municipal schools. Through active participation of the existing government school teachers, they plan to implement an Activity Based Learning (ABL) program through Multi-Grade-Multi-Level (MGML) education kits developed by Samavesh.

APNA SKOOL

Apna Skool, an education project for the children of migrant construction and brick kiln workers, is a project of Jagriti Bal Vikas Samiti, started by the faculty and students of IIT Kanpur. Apna Skool will study, learn and implement the model of Door Step School (DSS), one of Vibha’s successful models in Pune, and start involving the construction companies and the Government as stakeholders in the execution and scaling up of the project.

SAATH

Saath, a very well established organization in Ahmedabad, will also work in implementing the DSS model and bring early education centers for 250 children of construction workers. Saath has already made the construction companies as stakeholders and 50% of the nutritional costs and the space for these centers is provided by them.
VIBHA EVENT SHOWCASE

Vibha Dream Mile - Big Success for Atlanta and Bangalore Action Centers

Dream Mile Walk/Run, in its 16th year, continues to be the flagship national event of Vibha. In 2014, DreamMile was held in nine cities – Atlanta, Bay Area, Dallas, Houston, Los Angeles, Milwaukee, Minneapolis, Raleigh and Bangalore – with a combined participation of more than 5,000 and raised more than $300,000. This mainstream event brought together a wide cross-section of people to the same goal of raising awareness and funds for child development projects in India and USA. It is becoming a permanent fixture in several cities and was selected by Active.com as one of the “11 Charities to Run For” across the USA.

The volunteers of Vibha-Atlanta, where the DreamMile was first started in 1998, continue to challenge themselves. Once again, everyone – volunteers, participants and sponsors – rose to the challenge and beat most of their targets. More than 200 volunteers planned and executed a perfect event on a gorgeous Saturday on Sept 20th; about 1,500 people participated in the 5K/10K Walk/Run event. This also became a qualifier for the world-famous Peachtree Road Race in Atlanta. The initial target of raising $150,000 was achieved before the event even began. Phenomenal corporate support in kind and spirit by the title sponsor - Paramount Software Solutions - through a fundraising drive by their employees, helped the Atlanta DreamMile reach a total revenue of $190,000. The zeal and enthusiasm with which the volunteers organized the event was much appreciated. A sense of purpose of “Making a Difference” and a determination to “Pave a Path” for a generation was in the air!

2014 was also a big year for the Vibha-Bangalore (India) Action Center, where every goal they set for DreamMile - be it the number of participants, revenue raised or the positive experience for the runners - was met beyond expectations. Vibha-Bangalore, in only its second year of organizing the event, ran a fantastic marketing campaign over social media and billboards, and had more than 1,150 registrations – far exceeding the initial target of 700 registrations! The sponsors and the walk/run community are beginning to notice this new event in the city-calendar. We expect this event to grow exponentially in Bangalore. All this has been made possible only because of Vibha-Banglore’s highly motivated and dedicated team, that worked tirelessly and in unison to raise funds for the cause of underprivileged children.

Vibha Milwaukee brings Mystic India to Vibe 2014

After conducting Vibha Vibe successfully for the past 5 years in Milwaukee, the volunteers wanted to make the event even bigger and better. So, on March 29, 2014 – Milwaukee brought on an internationally acclaimed Bollywood musical dance troupe called Mystic India to add more zest to the Vibe event.

The show was super electrifying. For the first time in the event’s history, the show was sold out. Milwaukee volunteers were forced to turn away people on the day of the event. The audience in attendance was diverse where all ethnic communities were represented. Several folks drove all the way from Chicago and other parts of Wisconsin. Mystic India brought a troupe of about 25 professional dancers along with lots of colorful costumes, catchy songs; elaborate sets woven into a story narrated by a storyteller. The show was quite a treat for Milwaukee, and the audience was able to meet the artists for autographs and photo-ops after the show. The show gave the Milwaukee Action Center a much needed boost - it attracted almost 1,000 attendees and raised $10,000 in sponsorship.

Buffalo Cricket – Taking cricket to a whole new level

Buffalo is one of our new Action Centers which has grown over the last couple of years both in volunteer strength and in the quality of fundraising events. In August 2014, the Action Center conducted their annual T10 Men & Women’s Cricket fundraiser. The event was a big success. A total of 27 teams participated, of which seven teams were all women’s teams. The women’s teams gave the men a good challenge. Buffalo raised a total of $15,000 through this event. That’s a great start for an Action Center that started just two years ago. A big chunk of the revenue was raised through pledge drives conducted by not just Vibha volunteers but the participating teams as well. We are very happy to report that our fledgling Buffalo Action Center is growing and will make a bigger difference in the lives of thousands of children.
Success Stories

HIMANSHU

When we think of a 12 yr old with ADD (Attention Deficit Disorder) and from a family living in abject poverty, we wouldn’t expect anything short of a miracle to change that child’s life. Three years ago, Himanshu came to Jan Madhyam with aggressive and confrontational behavior, and was quite uncooperative. It was extremely challenging to work with him.

However, this challenge proved to be an opportunity for Jan Madhyam. They developed a program specifically for him consisting of counseling as well as involvement in interactive programs and activities. This program was aimed at helping him control his aggressive and confrontational behavior and become social. It worked! He eventually showed positive signs of improvement. He showed keen interest in activities like gardening, which has a calming effect on him. It also helped him focus and deal with poor concentration and discipline issues. He also showed a keen interest in the Jan Madhyam store and enjoyed being behind the sales counter. Today, he volunteers at the store every now and then, and handles sales and payments with confidence. His inclination towards this program has motivated Jan Madhyam to continue developing his skills further so that eventually he can be placed as a sales person in one of the stores. Himanshu was enrolled in one of the local schools but he was not keen to be in class with younger children and dropped out. Subsequently he is now given functional literacy at the Equal Opportunity Rural Technical Training and Education Centre (EORTTEC).

Jan Madhyam’s goal is to bring a challenged person into the mainstream and steer him/her towards a productive and fulfilling life focusing mainly on disadvantaged children. It promotes self-advocacy and self-sufficiency.

Jan Madhyam has been a Vibha supported partner since 2003. We stay committed to continue supporting Jan Madhyam’s efforts. As of today, this commitment has benefited more than 25,000 children and adults through training, and with one key focus - life skills training.

SWETA

When Sweta and her younger sister were very young, their family was going through difficult financial times. Their parents were illiterate and unemployed. Sweta and her sister never went to a school or received formal education. But the family aspired to do better, and they were approached by CORP – Community Outreach Program in Mumbai – a project supported by Vibha.

Sweta’s mother joined the CORP vocational training center to learn tailoring skills. Upon completion of her classes, she took on a small job and joined CORP’s Self Help group to learn other skills. Sweta’s dad learnt to drive a car and started working as a driver. The family was finally able to sustain themselves, and enrolled their two girls in the CORP bridge education program. Later, CORP helped enroll Sweta and her sister into a government school as well as after-school support classes at their centers.

Sweta gave her 10th grade board examination last year and graduated with 61 percentile. She secured an admission into the R.J Thakur College for further studies. She aspires to take a job in the banking sector. Sweta’s younger sister is currently in 8th grade and plans to finish her high school soon.
